Exclusively at **MENARDS®**

- A Drywall PVA Primer/Sealer (P001)**
This high-hiding primer and sealer in one prepares drywall, smooths sanded joints and provides excellent holdout when used under enamel topcoats.
- B 1000 Series (1000, 1500, 2000, 3000)**
A premium-grade paint that provides excellent hide, outstanding touch-up and a washable, scrubbable finish.
Available in Flat, Eggshell, Satin and Semi-Gloss.
- C Cabinet & Trim Enamel (3500)**
With excellent flow and leveling properties, this ultra-premium, non-blocking enamel provides a smooth, hard, washable coating that is resistant to grease and stains.
Available in Semi-Gloss only.
- D Pre-Catalyzed Water-Based Epoxy* (C.OCEP)**
This single-component epoxy offers the adhesion, durability and resistance to stains and most cleaning solvents usually characteristic of two-component waterborne acrylic epoxy products. This product can be applied over a wide variety of primers on properly prepared interior surfaces.
- E Latex Dry Fall (8950)**
This industrial grade dry fall has high hiding and high reflectance properties to enhance workplace safety. Ideal for application to interior ceilings, walls and structural surfaces, it is formulated to resist flash rusting and reduces bleed through. Overspray can be easily swept up after painting.
- F Alkyd Dry Fall (8750)**
A high solids, industrial grade alkyd dry fall with high reflectance properties. The dry paint film produces an intense white finish which increases the lighting efficiency in the area and promotes a safe working environment and allows overspray to be easily swept up after painting.
- G All-Surface 100% Acrylic Stain-Blocking Primer (P007)**
This 100% acrylic, stain-blocking primer is ideal for interior and exterior jobs and easily blocks tannins and bleeding wood, as well as a variety of stains on various substrates. It can also be used as a fast-drying primer on galvanized metal or under oil-based paints.
- H Block Filler Acrylic Latex (P9511)**
This heavy-duty filler provides great hide and fills porous surfaces to even out masonry, concrete, stucco, cement and flat-surfaced concrete block.
- I Acrylic Prime & Finish (P801)**
This durable, flash-rust and corrosion-resistant industrial coating provides excellent adhesion to slick surfaces, such as brushed and polished aluminum, fiberglass, PVC and gloss enamel coatings.
- J Alkyd Rust Control Metal Primer (P851)**
A tough, fast-drying, rust-inhibitive primer that is ideal for use over bare, previously coated or rusted steel surfaces. This high-solids primer may be used under both water-based and oil-based topcoats and as a barrier coat over conventional coatings when painting with high-performance topcoats.
- K Acrylic High Gloss (8000)**
A direct-to-metal (DTM), 100% acrylic gloss coating that offers a tough, durable, flash-rust and corrosion-resistant finish.
- L Alkyd Gloss (8500)**
This direct-to-metal (DTM) alkyd gloss coating offers a tough, durable, corrosion-resistant enamel finish. The high-solids, high-gloss formula is highly resistant to abrasion, corrosion and a variety of chemicals.

- M Elastomeric Stucco & Masonry Paint (5500)**
Formulated specifically for stucco and masonry surfaces, this interior/exterior flat coating offers elastomeric properties while including alkali resistance and long-term durability.
- N Traffic Marking Paint (9600)**
A quality, flat, acrylic, water-based traffic marking paint designed for striping parking lots and streets, as well as traffic and vehicle control areas. Can be used on concrete and asphalt surfaces.
- O Athletic Field Marking Paint (9533)**
This professional quality acrylic paint is for use on athletic playing fields. Ideal for marking and striping grass or artificial turf. Formulated for quick drying, ease of application and high visibility.
- P Acrylic Gloss Floor Enamel (9400)**
This ultra-durable, acrylic floor coating is designed to resist scuffs, marks and wear in high-traffic areas. The fast-drying formula is ready for foot traffic in just 24 hours, making it ideal for commercial areas requiring quick return to service.
- Q 5000 Series (5000, 6000, 7000)**
A 100% acrylic exterior premium-grade paint that offers a durable coating with low temperature application (down to 35 °F).
Flat, Satin and Semi-Gloss.
