Exclusively at **MENARDS®**

A 1000 Series (1000, 1500, 2000, 3000)
A premium-grade paint that provides excellent hide, outstanding touch-up and a washable, scrubbable finish.

Available in Flat, Eggshell, Satin and Semi-Gloss.

B Cabinet & Trim Enamel (3500)
With excellent flow and leveling properties, this ultra-premium, non-blocking enamel provides a smooth, hard, washable coating that is resistant to grease and stains.

Available in Semi-Gloss only.

C Drywall PVA Primer/Sealer (P001)
This high-hiding primer and sealer in one prepares drywall, smooths sanded joints and provides excellent holdout when used under enamel topcoats.

D Quick-Dry Alkyd Stain-Blocking Primer/Sealer (P008)
This stain-blocking alkyd blocks tenacious ink, odors, smoke and water damage stains while smoothing surface imperfections with a fast-drying formula.

E Pre-Catalyzed Water-Based Epoxy* (C.OCEP)
This single-component epoxy offers the adhesion, durability and resistance to stains and most cleaning solvents usually characteristic of two-component waterborne acrylic epoxy products. This product can be applied over a wide variety of primers on properly prepared interior surfaces.

F All-Surface 100% Acrylic Stain-Blocking Primer (P007)
This 100% acrylic, stain-blocking primer is ideal for interior and exterior jobs and easily blocks tannins and bleeding wood, as well as a variety of stains on various substrates. It can also be used as a fast-drying primer on galvanized metal or under oil-based paints. It can also be used as a fast-drying primer on galvanized metal or under oil-based paints.

G Traffic Marking Paint (9600)
A quality, flat, acrylic, water-based traffic marking paint designed for striping parking lots and streets, as well as traffic and vehicle control areas. Can be used on concrete and asphalt surfaces.

Available in White, Yellow, Safety Red & Handicap Blue.

H Acrylic High Gloss (8000)
A direct-to-metal (DTM), 100% acrylic gloss coating that offers a tough, durable, flash-rust and corrosion-resistant finish.

Available in White, Yellow, Safety Red & Handicap Blue.

I Elastomeric Stucco & Masonry Paint (5500)
Formulated specifically for stucco and masonry surfaces, this interior/exterior flat coating offers elastomeric properties while including alkali resistance and long-term durability.

J 5000 Series (5000, 6000, 7000)
A 100% acrylic exterior premium grade paint that offers a durable coating with low temperature application (down to 35 °F).

Flat, Satin and Semi-Gloss.
